Adaptive Radiation Mammalian Forelimbs Answers

Access Free Adaptive Radiation Mammalian Forelimbs Answer Key

The basic design of the mammalian forelimb demonstrates the evolutionary phenomenon of adaptive radiation. Through natural selection, the form of mammalian forelimbs has been modified during the last 65 million years into many shapes to perform a variety of functions. By adapting to forest, plains, air, water, and underground, mammals

Adaptive radiation is the evolution of a new species in a relatively short period of time. When many species share a single ancestor. burst of diversification of a group of organisms into an array

What is adaptive radiation? -

Access Free Adaptive Radiation Mammalian Forelimbs Answer Key

Answers

The simplest answer is that it's when there are many new species that have evolved from a single common ancestor. This often happens when a new species invades a new habitat, like a new island. For example, if a species of bird finds its way to an island it was previously never on, and it eventually evolves into several
