The location of the new excavations was the shore of a wetland when the footprints were made between 21,000 and 23,000 years ago. (Karen Carr) (Karen Carr) White Sands is now mostly a desert, but it was a lush wetland at the time the footprints were made and populated by mammoths, ground sloths, bovids — cattle — and wild camels, as well as by the Stone Age humans who hunted them.

Star Carr was a Mesolithic settlement in North Yorkshire that predates Cheddar Man by around 1,000 years. There, archaeologists uncovered red deer skull-caps (which may have been worn as headdresses), semiprecious stones including amber, hematite and pyrite and an engraved shale pendant known as the oldest Mesolithic art in Britain. While impossible to say for certain, similar kinds of objects ...
