**And**

Petroleum geology became an independent science in 1917 and since that time has developed from oil and gas seepages, anticlinal theory, trap theory, and petroleum deposits theory. Here, the phrase “petroleum deposits” refers to conventional oil and gas accumulation in a single trap with a uniform pressure

## **Petroleum Geology and Geophysics**

Understandably textbooks of petroleum geology almost invariably discuss the relation of petroleum deposits to the age of the rocks in which they occur. The general conclusion that younger reservoirs predominate has been accepted for a long time, no doubt primarily because the older the reservoir, the
