A music sequencer (or audio sequencer or simply sequencer) is a device or application software that can record, edit, or play back music, by handling note and performance information in several forms, typically

CV/Gate, MIDI, or Open Sound Control (OSC), and possibly audio and automation data for DAWs and plug-ins.

Music sequencer - Wikipedia

The controller circuit also ensures (with the help of the relay contacts) that the stop block remains in the power-up state until the train exits the stop block (otherwise the train may not move enough to pick up power beyond the isolated track), and the stop block is in power-down mode Infrared detectors also available as an Arduino shield. More than a year-and-a-half into the COVID-19 pandemic, burnout seems to be on everyone's lips. Many of us didn't realise what had hit us when we scrambled to adjust to the sudden upheaval of the workplace, switching to remote work with little or no preparation, or deemed an essential worker and asked to continue business-as-usual in highly unusual circumstances.
