general guidance about coding for services provided using the NuVasive® NVM5® system. It is not intended as a comprehensive guide to coding for intraoperative neuromonitoring services. Payers or their local branches may have their own coding and reimbursement requirements.

Intraoperative Neuromonitoring (IOM) Reimbursement Guide

Intraoperative neuromonitoring is an industry that relies on private companies to provide much of the training (although some colleges have started undergrad IONM programs). With little regulation on standards and an incentive to keep everything private, many in the field feel they have inadequate resources. Without the right tools available for surgical neurophysiologists to be successful, the entire field suffers as false positive and false negative rates become inflated.
