Peonies Of The World Taxonomy And Phyto geography

The peony or paeony is a flowering plant in the genus *Paeonia*, the only genus in the family Paeoniaceae. Peonies are native to Asia, Europe and Western North America. Scientists differ on the number of species that can be distinguished, ranging from 25 to 40, although the current consensus is 33 known species. The relationships between the species need to be further clarified.

1.10.6.2

This is the second part of the three volume set monograph Peonies of the World, a comprehensive taxonomic revision of the genus Paeonia. Part of Hong De-Yuan's extensive field work on the distribution of the genus Paeonia, and supported by the National Geographical Society, this book contains 356 colour photographs, taken from natural sites, covering all 32 species and 26 subspecies ...

Peonies of the World : Hong De-Yuan : 9781842464588

Answer . The current scientific review by Dr. Hong recognizes 54 species in the wild. His most recent review in English is Peonies of the world: taxonomy and phytogeography, published by the Royal Botanic Gardens, Kew, in 2010. The number of species found in the wild is quite different from the number of cultivars (human selections) found in gardens.
