Swanson Speed Square Manual - This item is a manual for ...

A Speed® Square (rafter square, rafter angle square, triangle square) is an American, triangular-shaped, carpenters' layout out tool which combines some of the most common functions of a try square, and framing square into one. It is used to make basic measurements and mark lines on dimensional lumber, and may be used as a saw guide for making short 45 and 90 degree cuts.

Speed® Square Archives - Swanson Tool Company

The Swanson ® Speed ® Square was first developed by company founder Albert Swanson in 1925. This innovative tool combines 5 tools into 1: 1. Try Square, 2. Miter Square, 3. Saw Guide, 4. Line Scriber, & 5. Protractor. The Speed ® Square is die-cast for durability and accuracy. Made of heavy-gauge aerospace aluminum alloy, it is built to last.

Swanson Speed Square User Guide - Legacyweekappeal.com.au ...

The Speed Square was made for scribing lines quickly. It has a lipped straight edge that provides 90° and 45° angles. Holding the lip of the Speed Square against a board, you can mark out perfect perpendicular and 45° lines as quickly as it takes to slide the Speed Square around. It also includes a scribe bar under its ruler.

The Speed Square was made for scribing lines quickly. It has a lipped straight edge that provides 90° and 45° angles. Holding the lip of the Speed Square against a board, you can mark out perfect perpendicular and 45° lines as quickly as it takes to slide the Speed Square around. It also includes a scribe bar under its ruler.

How To Use A Speed Square (AKA Rafter Square) | Pro Tool ...

Speed Square is best as squaring up smaller, shorter things rather than walls, because it is only 7 inches long (though Swanson also does offer a 12-inch version). For squaring up walls and rooms, you need at least a carpenter's square. Better yet is a laser level that casts an "X" mark.

How to Use a Speed Square & Why You Need One

• The pivot is a point at one end of the lip about which you can rotate the speed square to find angles. (It's often marked right on the tool; if not, the 0-degree mark should be at the opposite...

How to Use a Speed Square - Bob Vila

A speed square is a tool that just about every carpenter will have in her bag. It can be used to make lines perpendicular (square) to a board's edge. And it can be used to mark any angle (between 0 and 90 degrees) across a board's face. There are many other ways the speed square can be used, but I will focus on these two in this tutorial.
